

Dear Judge Michael E. Wiles

I'm writing you as a customer of Voyager digital. I have spent years saving investing & trading crypto assets to build what was a life changing amount of money that I would one day sell to provide college & other needs for my family. I, Jacob Redburn, had deposited 100 ethereum on to Voyager digital's trading platform. They said they would be open honest but a week before filing for bankruptcy the CEO posted how they were having no issues. Straight lied to us. The small % in returns does not justify them being able to just sell & steal our crypto. My family's future is ruined if they just get to not return my assets. even if I'm only given half back & then years later given or paid back the rest to me. This will ruin my future, my daughter's future & cost the government hundreds of thousands in capital gains I would pay when I do plan to sell. My plan was to stake my eth when eth 2.0 went live earning my family income to progress on. I beg that we are to receive our crypto that we've owed, not worthless stock or vxr tokens worth nothing.

Dear Judge Michael E. Wilco

I'm writing you as a customer of your
 digital. I have spent years saving money & trying
 to get my own business to build what was a life changing
 amount of money that I would use to help my
 to provide college & other needs for my family.
 I, Jason Roberson, had deposited 100 thousand
 dollars into a digital savings platform.
 I was told that would be open instant but once
 I was filling in bankruptcy the CEO contact was
 they were having no issues. Straight out to us
 the digital is in future does not consider them
 being able to just all I had one crypto for
 tonight future is ruined if they just get to
 not better my asset. And if it is only given
 but I don't know how good later give a good bank
 the best to me. This will be my future my
 character's future & lost the amount hundreds
 of thousands? Is digital giving me a good
 when I do have to sell my digital asset to
 stake my own when the CEO want the company
 my family income to provide for I say that
 his own future one crypto that was over a not
 an asset stock or pay to have another company.

Voyages should have to return 100% of our
crypto over time. The careless lending to
(SAC) seems like intentional failure because
no one is that dumb. I spend 6 years building
my crypto portfolio. Please consider the users that
were somewhat misled on the level of risk
that we were unaware we were being exposed to:
losing 100 eth will ruin my family. at market
peak that was 480000 dollars & I was waiting
for next cycle to sell out. They are stealing
basically at least 1/2 million dollars value from my
family. even if they work out a payment plan
to pay us back. I'm on board with that,
we just can't afford to lose 100 eth that
took 6 yrs. & thousands of dollars of savings
my life's savings would be wiped out. I
just don't understand how they can even
do this. Please help us. Customers as
primary lenders. We should be paid back first,
the corporations can afford the write off,
my family can not afford this. This will
set us back 10+ years. Thank you
for your time

Jacob Ryan Redburn
voyages customer

I would like to thank you for the \$1000.00
 gift. The money is being used to help
 pay for the funeral. I will be sure to
 let you know when it has been received.
 I am sorry that I cannot give you more
 but I will do my best. I hope you
 understand. I will be sure to let you
 know when the money has been received.
 I am sorry that I cannot give you more
 but I will do my best. I hope you
 understand. I will be sure to let you
 know when the money has been received.

Thank you for
 the money
